ribbon microphones

SIGMA 8

Our SIGMA ribbon mic has a smooth, silky, vintage character and is much easier to use than traditional ribbons thanks to its high sensitivity, super-low self noise and phantom-powered circuitry. **It excels on vocals, strings, piano and wind instruments.**

SIGMA comes in a flightcase with its unique Sontronics shockmount.

Frequency response: 20Hz - 15kHz
Maximum SPL: 125dB
Phantom power: 48V (±4V) required

APOLLO 8

After noticing that many musicians were using our SIGMAs in pairs, we combined two ribbons to create APOLLO, a Blumlein X/Y stereo ribbon mic with all that smoothness times two! Thanks to its large, open grille, **APOLLO soaks up every detail of your recording** and is ideal for orchestral, choral, operatic and ensemble work, both live and in the studio. Astonishing results from a beautiful mic.

Frequency response: 20Hz - 18kHz
Maximum SPL: 125dB
Phantom power: 48V (±4V) required

DELTA 8

Carefully engineered to deliver incredible results on guitar amps and other high-SPL sources (such as sax and brass), **DELTA is a go-to ribbon mic for live and studio sound.** The mic is supplied with its shockmount in an aluminium flightcase.

Frequency response: 20Hz - 15kHz
Maximum SPL: 140dB
Phantom power: 48V (±4V) required

instrument-specific microphones

DM-1B

Developed over three years with the help of top UK drummers and producers, our DM-1B is an end-fire cardioid condenser mic that handles a massive 155dB SPL. **DM-1B will perfectly capture all the characteristic boom and thump of your kick drum** and also sounds amazing on bass guitar cabs and other instruments such as low brass, timpani, tenor sax and double bass.

Frequency response: 20Hz - 20kHz
Max. SPL: 155dB (with -15dB pad engaged)
Phantom power: 48V (±4V) required

DM-1S DM-1T

Developed alongside the DM-1B, these cardioid condenser mics, each boasting a -10dB pad, are designed specifically for use on snare (DM-1S) and tom (DM-1T). With subtly different responses and pickup patterns, **they reproduce all the subtle details of your drums** and give fantastic results on kit and orchestral snare, rack and floor toms as well as congas, bongos, cajón, djembes, tabla and other percussion.

Frequency response: 30Hz - 20kHz
Max. SPL: 135dB (with -10dB pad engaged)
Phantom power: 48V (±4V) required

NEW!

SOLO

dynamic microphones

The newest addition to the Sontronics line-up is the SOLO dynamic mic, designed, developed and made in the UK. It's a **stunning sounding mic for live vocals, guitar amps, drums and more**, with a tight supercardioid pattern, superb side rejection, excellent feel in the hand and requiring zero EQ. No stage or studio should be without one!

Frequency response: 50Hz - 15kHz
Phantom power: not required

HALO

HALO is a dynamic mic that has been specifically designed, inside and out, to get the best results from guitar amps. With a specially engineered capsule (based on that in our best-selling STC-80) and its vintage-inspired styling, **HALO is the perfect mic for your amp giving stunningly warm yet punchy sound** without needing to touch the EQ.

Frequency response: 50Hz - 15kHz
Phantom power: not required

A BIT ABOUT US

SONTRONICS is a British microphone brand founded in 2004 by musician and audio enthusiast Trevor Coley, who designs and develops all our products here in the UK. Our mics are beta-tested with top producers and several Abbey Road engineers.

Our passion has always been to design innovative products that deliver outstanding results at a realistic price, and that passion has seen SONTRONICS grow into a brand respected worldwide. We are extremely proud to have some incredibly talented artists among our users, including Ed Sheeran, Paul Epworth, Flood, Dave Grohl, Muse, Aerosmith and many others.

Try a SONTRONICS mic or preamp today... it will change the way you hear things!
